Portfolio

Technical skills

C++, C#

Unreal Engine 5

Gameplay, Tools

Console porting

Soft skills

Autonomy

Teamwork

Adaptability

Technical curiosity

Career Objective

Gameplay programmer with strong C++ and systems programming foundations, seeking to transition toward engine development and contribute to core engine

Experience

2024 - 2026

Wild Blueberry Games,
Montréal

Gameplay developer

- **Ported** "The Caribou trail" on **PS5** under contract with Unreliable narrators (Unreal Engine 5)
- **Developed** and **shipped** the game "Echoes of the Court" on PC, Android, and iOS (Unreal Engine 5) under contract with Affordance Studio
- **Refactored** and **optimized** existing prototype and pre-production codebases
- **Developed systems, tools, gameplay** features, and UI using **Unreal Engine 5** and Unity

2023

Orange,
Lyon

Developer Trainee, Orange

- Developed internal tools in C# (.NET)
- Worked within a SCRUM team
- Presented tools to clients

Projets

2024

Université de Sherbrooke,
Longueuil, Canada

Mari, Shadows of Pazuzu (TPS Roguelike)

- 7-person team - Unreal Engine 5
- Implemented advanced **AI** techniques and used the **Gameplay Ability System**
- Implemented **multiplayer** with **dedicated server** and connected **backend**
- Focused on building flexible, **data-driven systems** designed for easy tuning and iteration
- Developed **debugging tools** for AI and gameplay

2023

Université de Sherbrooke,
Longueuil, Canada

Snowball (Time-Trial game)

- 4-person team - **C++ game engine developed in-house**
- Integrated **graphics techniques** using **3D API (DirectX11)**: vignette, radial blur, depth of field, speed lines
- Integrated **PhysX** to manage game physics **within our engine**

Education

2023 - 2024

Université de Sherbrooke,
Longueuil, Canada

Master's Degree in Computer Science, specializing in Video Game Development

Program focused on **C++ programming, computer graphics, and AI applied to video games**, with **team-based projects** supervised by professionals from the Montréal game industry

2021 - 2023

École polytechnique
de l'université de Tours

Engineering Degree in Computer Science

Specialization in systems architecture: low-level programming (C, C++, CUDA), operating systems, **parallel computing**, and **multi-threading**
