SUMMARY

Born in France and currently working as a gameplay developer in Montréal, I'm looking to continue my career back in France, with a strong interest in engine programming and performance-focused systems.

TECHNICAL SKILLS

Developing Features	Optimizing existing code	Working closely with designers
Refactoring existing code	Porting to PS5, Xbox, Mac, mobile	Working with UE5 or Unity
Cross-platform porting R&D	Developing tools	Working independently on a research project

PROFESSIONAL EXPERIENCE

Gameplay developer, Wild Blueberry

May 2024 - Present

- Developed architectures, gameplay features, tools, and UI systems in both Unreal Engine 5 and Unity projects
- Refactored pre-production codebase and optimized mobile performance (up to 5× faster)
- Worked closely with another studio as a solo developer to finish and ship their game

Developer Trainee, Orange

June 2023 - Aug 2023

- Developed and delivered C#/.NET tools independently from start to finish for internal clients.
- Worked in a CI/CD environment with automated testing and self-hosted databases/servers.
- Assisted with debugging and optimization of existing backend code

PROJECTS

Mari, Shadows of Pazuzu (TPS Roguelike)

Jan 2024 - Mai 2024

- 7-person team - Unreal Engine 5
- Implemented advanced AI techniques and used the Gameplay Ability System
- Implemented multiplayer with dedicated server and connected backend
- Focused on building flexible, data-driven systems designed for easy tuning and iteration
- Developed debugging tools for AI and gameplay

Snowball (Time-Trial game)

Oct 2023 - Dec 2023

- 4-person team - C++ game engine developed in-house
- Integrated PhysX to manage collisions and joints between objects
- Integrated graphics techniques using DirectX11: vignette, radial blur, depth of field, speed lines

EDUCATION

Master's Degree in Computer Science, specializing in Video Game Development Aug 2023 - May 2024

Université de Sherbrooke, Longueuil, Canada

- Program focused on C++ programming, computer graphics, and AI applied to video games
- Team projects supervised by professionals from the Montréal game development industry

Engineering Degree in Computer Science

Sep 2021 - May 2024

Polytech Tours

- Specialization in system architecture, parallel computing, and multithreading.
